

Training courses for practitioners and operators involved with bone densitometry

This intensive clinical densitometry course is intended for both doctors and technologists. It covers the pathophysiology of osteoporosis, as well as the principles and practice of bone densitometry, body composition measurement and reporting of scans.

You should consider this course if:

- You have a tertiary education in a science based course, including nursing, and you have not previously received formal training for bone densitometry.
- You are currently a DXA operator who has not undertaken formal training or who is seeking an advanced update of their work practices.
- You are a medical specialist, or specialist registrar in training, with responsibility for bone density testing and are seeking deeper knowledge of the technological and quality assurance aspects of bone densitometry measurements and reporting.

Course structure:

- Participants are provided with extensive online course material prior to the commencement of the course and are required to read through all the material before they attend the lecture series
- Participants then attend a two day lecture & workshop series, which includes interactive sessions allowing use of manufacturer specific DXA software
- Additional online material is provided after the course
- An online multiple choice examination is held two weeks after completion of the lecture series
- Upon completion of the course and achievement of a pass mark in the examination, participants will be awarded a [Certificate of Completion in Clinical Bone Densitometry](#), which satisfies the requirements of radiation safety legislation in all Australian states

Venue:

Faculty of Medicine and Health Sciences
85 Park Road, Grafton, Auckland
New Zealand

Date:

6th and 7th April 2019

Registration Deadline:

29th March 2019 (or earlier if fully booked)

Early online Registration:
